- E. SESSION SUMMARY:

Session 1 (ERV): a total wash out with a myriad of confusing images and loose associations with no consistency at all. Kept lapsing into Native American oriented mythological scenes and concepts.

Session 2 (CRV): a series of monolithic structures ; huge oblong objects, They appear to be of natural rock but some have been altered or manipulated. There is moving water at the base of several of these features. There are wooden "attachments" connected to these monoliths. One of the features appears as a large eye in profile.

There is a circular object enclosed by a barrier. This barrier is reminiscent of a fenceline. The circular object is an "air enclosure"(?). There are oval shapes and a series of parallel curving lines. The concepts of descent and movement are associated with the latter features.
